

Physics Research and Technology

A KINEMATICS AND MOTION ANALYSIS

From Mechanics to Robotics

ÖZDEN ŞENGÜL

NOVA

Contents

Preface		vii
Chapter 1	Transformations of Physics and Future Visions	1
	Özden Şengül	
Chapter 2	Motion Analysis Methods and Their Use in the Clinic	39
	Gulnihal Metin	
Chapter 3	Inverse Kinematics of a Hyper-Redundant Planar Manipulator with Obstacle Avoidance Using an MLP Neural Network.....	71
	Vladimir Hlavac	
Chapter 4	Mechanics to Machines: The Expanding Role of Kinematics in Motion Science	105
	Firat Akbalik	
Chapter 5	Kinematics of Behavioral Expression: Using Robotics to Model Nonverbal Communication in Counseling Contexts	133
	Thseen Nazir and Nadire Gülçin Yıldız	
Chapter 6	Nanotechnology in Robotics: A Pedagogical Bridge Between Physics and Engineering	155
	Tuğba Yüksel	
Chapter 7	An Integrated Approach to Teaching Physics	179
	Yuki Kaneko and Aslıhan Muazzez Ünsal
